**Restricted Tender Procedure for Data Collection and Analysis Services – Publication No. 01/2026  
- CIG B9F12D19A1**

**Tender Title: *Service Contract - Hydrological, Hydrogeological and Meteorological Data Collection and Analysis under the Programme – Strengthening Climate Resilience in the Lake Baringo Watershed (ACT-61897: Green Deal #TeamEuropeKenya – Part II)***

The Italian Agency for Development Cooperation (AICS) – Nairobi Regional Office is implementing the Programme “Strengthening Climate Resilience in the Lake Baringo Watershed (ACT-61897: Green Deal #TeamEuropeKenya – Part II)”, funded by the European Union – Delegation to the Republic of Kenya. The Programme aims to promote climate resilience, sustainable land and water management, and improved livelihoods in the Lake Baringo watershed area through a coordinated #TeamEurope approach.

Description of the Contract:

The contractor will collect and analyse hydrological, hydrogeological, and meteorological data to inform decision-making on natural resource conservation and erosion control. Key outputs include an Environment Baseline Report and the establishment of a hybrid (remote sensing and field monitoring) data collection and analysis system to support project interventions and enhance community involvement in water management.

The total maximum value of this tender is EUR 575,000.00, exclusive of all taxes and duties.

All documentation related to this tender, including the application modalities and all relevant information, are described within the documents accessible at the following address:
